

ResumeIQ — Job Descriptions & Scoring Guide

Sample JDs for Testing All Match Levels

How Match Levels Work

Match Level	Score Range	Colour	Typical Reason
Strong Match	≥ 75%	Green	High skill overlap + strong TF-IDF similarity
Good Match	50–74%	Amber	Partial overlap, relevant domain
Partial Match	30–49%	Orange	Some transferable skills, missing core stack
Weak Match	< 30%	Red	Different domain or very few matching skills

JD 1 — Machine Learning Engineer (Senior)

Expected Match: **STRONG** (≥75%) with resume_strong_match_ravi_sharma.pdf

Expected Match: **PARTIAL** (~35–45%) with resume_medium_match_priya_nair.pdf

Expected Match: **WEAK** (< 20%) with resume_low_match_arjun_menon.pdf

Company: DataSphere Technologies

Location: Bengaluru | Experience: 3–5 years | Type: Full-time

Job Description:

We are looking for a Senior Machine Learning Engineer to join our AI Products team. You will design, develop, and deploy production-grade ML models and MLOps pipelines that power our core data intelligence platform serving 50M+ users.

Responsibilities:

- Design and deploy deep learning models using PyTorch and TensorFlow for NLP and computer vision tasks.
- Build end-to-end MLOps pipelines using MLflow, Docker, Kubernetes, and AWS services.
- Develop and maintain FastAPI/Django REST APIs for model serving at scale.
- Collaborate with data engineering teams to build ETL pipelines using Apache Spark and Airflow.
- Mentor junior engineers and contribute to ML architecture decisions.

Requirements:

- 3–5 years of experience in ML engineering or related software engineering roles.
- Strong proficiency in Python, PyTorch, TensorFlow, scikit-learn, Pandas, NumPy.
- Experience with MLOps: model versioning, CI/CD for ML, monitoring (Grafana/Prometheus).
- Solid knowledge of AWS (EC2, S3, Lambda, SageMaker), Docker, Kubernetes.
- Experience with NLP/Computer Vision pipelines.
- B.Tech/M.Tech in CS, AI, or related field from a reputed institution.

Nice to Have:

- Familiarity with LLMs, Hugging Face transformers, or GPT fine-tuning.
- Experience with Redis, Kafka, or streaming architectures.
- AWS Machine Learning Specialty certification.

JD 2 — Full-Stack Developer (React + Node.js)

Expected Match: **GOOD/MEDIUM** (55–70%) with resume_medium_match_priya_nair.pdf

Expected Match: **PARTIAL** (~30–40%) with resume_strong_match_ravi_sharma.pdf

Expected Match: **WEAK** (< 15%) with resume_low_match_arjun_menon.pdf

Company: Accenture Digital

Location: Chennai / Remote | Experience: 1–3 years | Type: Full-time

Job Description:

Join our Digital Products team as a Full-Stack Developer building modern web applications for enterprise clients. You will work across the stack — from React frontends to Node.js backends — delivering features end-to-end.

Responsibilities:

- Build responsive React.js components with Redux state management and Tailwind CSS.
- Develop RESTful APIs using Node.js and Express connected to MySQL/PostgreSQL databases.
- Implement authentication flows (OAuth, JWT) and integrate third-party APIs.
- Write unit and integration tests using Jest and Selenium.
- Work in Agile sprints using Jira and follow CI/CD practices with GitHub Actions.

Requirements:

- 1–3 years experience in web development with React and JavaScript/TypeScript.
- Proficiency in HTML, CSS, Tailwind CSS, and responsive design principles.
- Experience with Node.js, Express, REST APIs.
- Knowledge of SQL databases (MySQL/PostgreSQL) and Firebase.
- Familiarity with Git, GitHub, Agile/Scrum methodologies.
- Good eye for UI/UX; experience with Figma a plus.

Nice to Have:

- Experience with Next.js, GraphQL, or TypeScript.
- Docker/AWS knowledge for deployment.
- Contributions to open-source React projects.

JD 3 — Software Engineer (Fresher/Junior)

Expected Match: MEDIUM (~40–55%) with IIT fresher resume (e.g. Aashritha's CV)

Expected Match: PARTIAL (~25–35%) with resume_low_match_arjun_menon.pdf

Company: Razorpay

Location: Bengaluru | Experience: 0–1 year / Fresher | Type: Full-time

Job Description:

We are hiring talented fresh engineers who love to code and solve real-world fintech problems. You will contribute to building Razorpay's payment infrastructure and internal tools as part of our Engineering Excellence program for new graduates.

Responsibilities:

- Design and implement backend services in Python or Java for payment processing systems.
- Work on data structures and algorithms challenges that power high-performance APIs.
- Write clean, testable code following SOLID principles and design patterns.
- Collaborate with senior engineers on feature design, code reviews, and technical documentation.
- Participate in on-call rotations and debug production incidents.

Requirements:

- B.Tech/B.E. in Computer Science or related field from a recognized institution (2023–2025 batch).
- Strong fundamentals in data structures, algorithms, and optimization.
- Proficiency in at least one language: Python, Java, or C++.
- Knowledge of SQL and basic database design.
- Understanding of REST APIs and how web services work.
- Good communication and teamwork skills; experience as class representative or club leader is a plus.

Nice to Have:

- Projects demonstrating end-to-end development (web apps, APIs, or tools).
 - Familiarity with Git, Linux, and basic DevOps concepts.
 - Competitive programming experience (Codeforces, LeetCode).
-

JD 4 — Data Analyst

Expected Match: MEDIUM (~45–60%) with resume_strong_match_ravi_sharma.pdf

Expected Match: WEAK (~15–25%) with resume_low_match_arjun_menon.pdf

Expected Match: PARTIAL (~30–40%) with resume_medium_match_priya_nair.pdf

Company: Swiggy Analytics

Location: Hyderabad | Experience: 1–3 years | Type: Full-time

Job Description:

Swiggy's Data & Insights team is looking for a Data Analyst to drive data-driven decision-making across our logistics, restaurant partner, and consumer experience functions.

Responsibilities:

- Write complex SQL queries and build dashboards using Tableau and Power BI for business stakeholders.
- Perform statistical analysis using Python (Pandas, NumPy, Matplotlib, Seaborn) to identify trends.
- Collaborate with engineering teams on data pipeline design and ETL processes.
- Build predictive models using scikit-learn for demand forecasting and churn prediction.
- Communicate findings through data visualization and executive presentations.

Requirements:

- 1–3 years experience in data analysis or business intelligence.
- Strong SQL skills (PostgreSQL, MySQL) and Python proficiency (Pandas, NumPy).
- Experience with Tableau, Power BI, or equivalent data visualization tools.
- Knowledge of statistical modeling, probability, and hypothesis testing.
- Familiarity with data warehousing concepts (ETL, Snowflake, or similar).

Quick Reference: Resume × JD Match Matrix

Resume	JD 1 (ML Eng)	JD 2 (Fullstack)	JD 3 (Fresher SWE)	JD 4 (Data Analyst)
Ravi Sharma (Strong)	■ Strong ~80%	■ Partial ~38%	■ Good ~55%	■ Good ~50%
Priya Nair (Medium)	■ Partial ~30%	■ Good ~65%	■ Partial ~40%	■ Partial ~35%
Arjun Menon (Low)	■ Weak ~12%	■ Weak ~10%	■ Partial ~28%	■ Weak ~18%
Aashritha (IIT Fresher)	■ Partial ~35%	■ Weak ~20%	■ Medium ~48%	■ Partial ~30%

Instructions for Testing

- Upload any of the 3 sample PDFs (or Aashritha's CV) to the ResumeIQ website.
- Navigate to 'JD Match' tab and paste one of the 4 job descriptions above.
- Observe the match score, matched skills, and missing skills sections.
- Use JD1 with Ravi's resume for a STRONG match demonstration.
- Use JD2 with Priya's resume for a MEDIUM/GOOD match demonstration.
- Use JD1 or JD2 with Arjun's resume for a WEAK match demonstration.
- Use JD3 with Aashritha's resume for a MEDIUM fresher match demonstration.
