

CAREER OBJECTIVE

Mechanical Engineer with 3 years of experience in product design, CAD modeling, and manufacturing processes. Seeking opportunities in product development roles with exposure to Industry 4.0 and smart manufacturing systems.

SKILLS

CAD/CAM: AutoCAD, SolidWorks, CATIA, Ansys

Manufacturing: CNC Programming, GD&T, Lean Manufacturing, Six Sigma

Analysis: FEA, CFD, Thermal Analysis

Programming: MATLAB (basic), Python (basic)

Soft Skills: Team leadership, project management, technical documentation

EXPERIENCE

Product Design Engineer — Bosch India, Nashik

July 2021 – Present

- Designed and optimized 15+ mechanical components for automotive systems using SolidWorks and CATIA.
- Reduced material waste by 18% through redesign of manufacturing jigs and fixtures.
- Conducted FEA simulations to validate structural integrity under load conditions.
- Collaborated with supply chain teams to ensure BOM accuracy and component sourcing.

Graduate Trainee — L&T; Heavy Engineering, Chennai

June 2020 – June 2021

- Assisted in shop floor operations and quality control inspections for pressure vessel fabrication.
- Prepared technical reports and maintained engineering drawings per ISO standards.

EDUCATION

B.Tech Mechanical Engineering — NIT Calicut | 2016–2020

CGPA: 7.8/10

PROJECTS

Optimization of Heat Exchanger Design

- Applied CFD analysis using ANSYS Fluent to improve heat transfer efficiency by 22%.
- Published findings in college technical symposium (Best Paper Award).

Automated Conveyor System (IoT Integration)

- Designed conveyor belt system with basic Arduino-based sensor integration for fault detection.
- Programmed MATLAB scripts for data logging and anomaly detection.

CERTIFICATIONS

- Six Sigma Green Belt — ASQ (2022)
- SolidWorks Certified Professional — Dassault Systèmes (2021)
- Lean Manufacturing Fundamentals — NPTEL (2020)
